

## INTELLIGENT MANUFACTURING SOLUTIONS

We are impacting global manufacturing operations and profits by creating the standard for the world's first end-to-end "Smart Manufacturing" solution. We deploy IoT (Internet of Things) technologies through

unique applications in the industrial space. Our tailored implementations translate IoT big data and analytics into the "smartest" manufacturing solutions by closing the loop to provide customized action prompts and tracking.

1

### ASSESSMENT

Detailed facility analysis to determine exact areas and opportunities for improvement

2

### IoT END-TO-END SOLUTION

Full, turnkey implementation that gives you actionable data on critical components of your operations.

3

### CLOSING THE LOOP

Turn findings into real-time alerts and actions while management is trained on how to use the data.

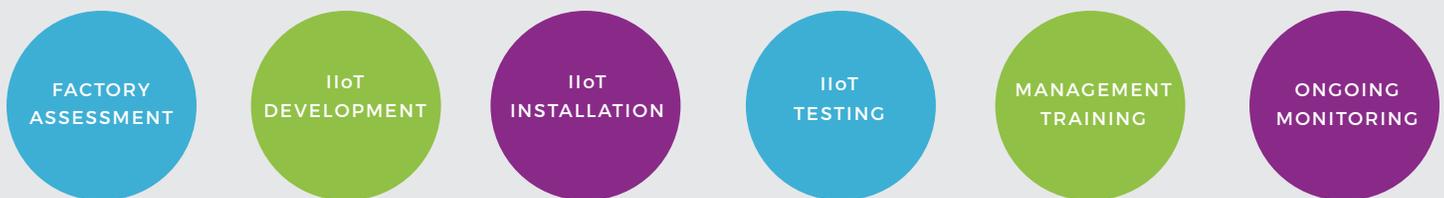

**OUR END-TO-END SOLUTION INCREASES PRODUCTIVITY,  
YIELD, REVENUE, AND PROFITS**

## INDUSTRIAL INTELLIGENCE IS A **SIMPLIFIED** SOLUTION FOR IOT

Our turnkey, simple solution allows you to fully connect your facility. Our Cloud-based dashboards add visibility and accountability to various processes ranging from purchasing and electronic Kanban replenishment throughout all stages of warehousing, fabrication, subassembly, assembly, and

finished goods. In short, this technology is simply the fastest, most customizable solution to manufacturing and requires very limited resources from your company to implement.

### SERVICES FLOW CHART

### KEY BENEFITS

- Receiving
- Warehouse of raw materials and purchased parts
- PFEP (Plan for every part)
- Material fabrication
- Sub-assembly
- Work in process and pay gat tracking
- Lineside presentation
- Final assembly
- Metrics/Controls
- Finished goods
- Asset utilization
- Augmented reality
- Predictive alerting
- Mobile apps
- Tool tracking
- Predictive reporting
- Predictive Maintenance

**AND MUCH MORE!**

**OUR END-TO-END SOLUTION INCREASES PRODUCTIVITY,  
YIELD, REVENUE, AND PROFITS**
